

Waste and Recycling Strategy

19 June 2018 in Hanover, Germany

Currently German language only; English simultaneous translation only in case of major demand / reception of a sufficient amount of international registrations

Waste and Recycling Strategy, 19 June 2018

8:30 Start

Block 1: China's tighter import regulations reduce waste exports and increase quality requirements for recycled materials. An impulse for more circular economy?

1. China's green fence policy and the waste and recycling economy in China. *Prof. Dr. Michael Nelles, University of Rostock*
2. Current situation and further EU strategy to increase the material recycling of waste. *Prof. Dr. Helmut Maurer, European Commission, Brussels*
3. Current situation and perspectives of the circular economy from the point of view of the waste management industry. *Peter Kurth, German Waste Industry Association (BDE), Berlin*
4. Requirements for the treatment of special WEEE under resource and pollutant aspects. *Julia Wolf, Dr. Ralf Brüning Dr. Brüning Engineering, Brake, Lisa Nellesen, Jochen Schiemann Institut für Energie- und Umwelttechnik e.V., Duisburg*

10:30 – 11:00 Coffee break

Block 2: More circular economy through improved valorization of waste: What can state-of-the-art technology do?

5. Performance of latest wet separation processes and sensible drying processes for wet processed materials. *Reinhard Schu, EcoEnergy, Göttingen*
6. Performance of latest electrostatic separation processes. *Andreas Wunsch, hamos GmbH, Penzberg*
7. Performance of latest sensor based sorting methods. *Ernie Beker, RTT-Steinert*
8. Maximising value in recycling: Mining and metal applications by fast inline elemental analysis. *Christian Bohling, SECOPTA analytics GmbH, Teltow*

13:00 – 14:15 Lunch

Block 3: Production of goods from recycled materials and challenges from new materials and modified waste compositions

9. From residual waste treatment to production of commodities: High-grade separation and treatment of residual waste and mixed municipal waste through intelligent combination of processes. *Dr. Matthias Kühle-Weidemeier, Wasteconsult international, Langenhagen*
10. Production of good from plastics recovered from waste treatment. *Dr. Dirk Textor, Dr. Textor Kunststoff GmbH*
11. What changes in the future municipal waste composition can be expected? *Holger Alwast, Prognos, Berlin*

16:15 – 16:45 Coffee break

12. Recycling of fiber-reinforced (partially) bio-based thermosets. *Christina Haxter, Fraunhofer-Institut für Holzforschung, Hanover*
13. Replacement of metals by thermoplastic fiber composites of natural fibers. *Benedikt Lahl, Volkswagen AG, Wolfsburg*

Panel discussion:

Economically and ecologically sustainable development of the waste and recycling industry to circular economy. What are the right strategies, what is technically possible and how will the future composition of waste develop?

18:15 End of the conference
